

## Peer Testing

Saturday, 7 July 2018 9:21 PM

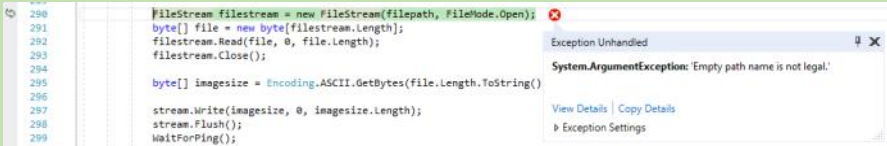

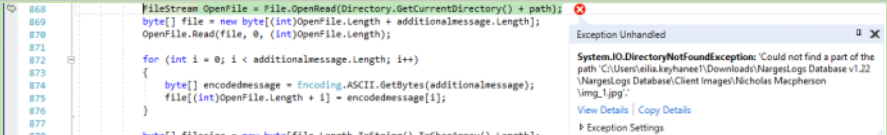

### Test 1:

Tester name: Mousa Keyhaneh  
Date: 30/07/2018

Feature	Errors/Bugs Encountered	Error Screenshot	Fixed/Not Yet Fixed	Notes	Importance level
Login	NA				
Logout	NA				
Search Patients	Entering space at the end of a patient name could be a common mistake that I made. Stops search function from working.		Fixed	No modular or unit testing was needed as the bug needed a new feature to be implemented.	Minor
Sort Patients	NA				
Add Patients	Runtime crash when 'add' was clicked.		Fixed	Added a date validation function for the date of birth field.	Major
Remove Patients	NA				
View Patients	NA				
Add Profile Images	NA				
Add Visits	Closed window with cross instead of 'back' button and no visit loaded until I reopened the patient	NA	Fixed	No modular or unit testing was needed as the bug needed a new feature to be implemented. The cross button now does the same thing as the 'Back' button.	Major
Remove Visits	NA				
View Visits	Runtime crash when the visit was clicked for viewing		Fixed	This error was clearly caused by the previous major bug that did not correctly save the visit after cross was clicked instead of 'Back'. The half-saved visit did not have any notes saved and the server could therefore not find any. While this particular error should not happen again, error catching has been put in place just in case.	Major
Edit Notes	Could not find a way to save notes... clicked edit and save again. This added a second empty visit.		Fixed	Used an 'if' statement to determine if a new entry should be created, this stops a new entry being created each time save is clicked indiscriminately.	Critical
Add images	No loading cursor		Fixed	Used a dispatcher to change the cursor of the correct thread.	Minor
Remove images	NA				
Save images	NA				

### Test 2:

Tester name: Nicholas Macpherson  
Date: 1/08/2018

Feature	Errors/Bugs Encountered	Error Screenshot	Fixed/Not Yet Fixed	Notes	Importance Level
Login	N/A				
Logout	N/A				
Search Patients	Make 'enter' click the enter button.		Fixed	No unit or modular testing was required as the bug was simply a new feature.	Minor
Sort Patients	N/A				
Add Patients	Added picture and cancelled with the cross on the open file dialog and caused runtime crash.		Fixed	Added error checking to make sure a file is selected by the user before attempting to use that file.	Major
Remove Patients	N/A				
View Patients	Viewing a patient sometimes causes a runtime crash.		Fixed	The error is considered to be caused by human error when resetting a server. An error catch was put in place anyways.	Critical

Add Profile Images	N/A				
Add Visits	Clicking 'Save' while leaving the 'Reason' field empty causes the program to hang.		Fixed	An error catch was put in place to ensure both fields are filled in.	Critical
Remove Visits	N/A				
View Visits	N/A				
Edit Notes	N/A				
Add images	N/A				
Remove images	N/A				
Save images	N/A				

### Test 3:

Tester name: Griffin Houston  
Date: 2/08/2018

Feature	Errors/Bugs Encountered	Error Screenshot	Fixed/Not Yet Fixed	Notes
Login	Na			
Logout	Na			
Search Patients	Na			
Sort Patients	Na			
Add Patients	Na			
Remove Patients	Na			
View Patients	Na			
Add Profile Images	Na			
Add Visits	Na			
Remove Visits	Na			
View Visits	Na			
Edit Notes	Na			
Add images	Na			
Remove images	Na			
Save images	Na
